

## INDEX TO VOLUME 143

## Alphabetical Table of Contents of Authors

- ADAMS, ELDRIDGE S. Settlement tactics in seasonally territorial animals: resolving conflicting predictions, 939
- ÅGREN, JON, and DOUGLAS W. SCHEMSKE. Evolution of trichome number in a naturalized population of *Brassica rapa*, 1
- ALVAREZ-BUYLLA, ELENA R. Density dependence and patch dynamics in tropical rain forests: matrix models and applications to a tree species, 155
- ARNOLD, STEVAN J., and DAVID DUVAL. Animal mating systems: a synthesis based on selection theory, 317
- BELOVSKY, GARY E. See JONATHAN M. CHASE
- BERGELSON, JOY. The effects of genotype and the environment on costs of resistance in lettuce, 349
- BERNARDO, JOSEPH. Experimental analysis of allocation in two divergent, natural salamander populations, 14
- BIONDINI, MARIO E., and CAROLYN E. GRYGIEL. Landscape distribution of organisms and the scaling of soil resources, 1026
- BOHLIN, T., C. DELLEFORS, U. FAREMO, and A. JOHLANDER. The energetic equivalence hypothesis and the relation between population density and body size in stream-living salmonids, 478
- BREWER, CAROL A. See WILLIAM K. SMITH
- BROWN, JERRAM L., and AMY EKLUND. Kin recognition and the major histocompatibility complex: an integrative review, 435
- CARRASCAL, LUIS M. See JOSÉ LUIS TELLERÍA
- CHASE, JONATHAN M., and GARY E. BELOVSKY. Experimental evidence for the included niche, 514
- CLARK, COLIN W., and MICHAEL L. ROSENZWEIG. Extinction and colonization processes: parameter estimates from sporadic surveys, 583
- COHAN, FREDERICK M. The effects of rare but promiscuous genetic exchange on evolutionary divergence in prokaryotes, 965
- COOPERSMITH, CAROL B. See SARAH LENINGTON
- CRESPI, BERNARD J. See PETER D. TAYLOR
- CROWLEY, PHILIP H., and KEVIN R. HOPPER. How to behave around cannibals: a density-dependent dynamic game, 117
- DAYAN, TAMAR, and DANIEL SIMBERLOFF. Morphological relationships among coexisting heteromyids: an incisive dental character, 462
- DELLEFORS, C. See T. BOHLIN
- DUVAL, DAVID. See STEVAN J. ARNOLD
- DWYER, GREG. Density dependence and spatial structure in the dynamics of insect pathogens, 533
- EDWARDS, SCOTT V., and SHAHID NAEEM. Homology and comparative methods in the study of avian cooperative breeding, 723
- EKLUND, AMY. See JERRAM L. BROWN
- ELLNER, STEPHEN, and NELSON G. HAIRSTON, JR. Role of overlapping generations in maintaining genetic variation in a fluctuating environment, 403
- EMERSON, SHARON B. Testing pattern predictions of sexual selection: a frog example, 848
- ERHART, MARK. See SARAH LENINGTON
- ESHEL, ILAN, and EMILIA SANSONE. Parent-offspring conflict over sex ratio. II. Offspring response to parental manipulation, 987
- FAREMO, U. See T. BOHLIN
- FOLSTAD, IVAR. See CLAUS WEDEKIND
- GROSS, JOHN E. See LISA A. SHIPLEY
- GROVER, JAMES P. Assembly rules for com-

- munities of nutrient-limited plants and specialist herbivores, 258
- GRYGIEL, CAROLYN E. See MARIO E. BIONDINI
- HAIRSTON, NELSON G., JR. See STEPHEN ELLNER
- HEDRICK, PHILIP W. Evolutionary genetics of the major histocompatibility complex, 945
- HELMS, KEN R. Sexual size dimorphism and sex ratios in bees and wasps, 418
- HOBBS, N. THOMPSON. See LISA A. SHIPLEY
- HOPPER, KEVIN R. See PHILIP H. CROWLEY
- HOUGEN-EITZMAN, DAVID, and MARK D. RAUSHER. Interactions between herbivorous insects and plant-insect coevolution, 677
- INCHAUSTI, PABLO. Reductionist approaches in community ecology, 201
- JOHLANDER, A. See T. BOHLIN
- KOUFOPANOU, VASSILIKI. The evolution of soma in the Volvocales, 907
- KRAUSE, ANDREAS. See BERNHARD SCHMID
- LAMEY, CAMELIA S. See TIMOTHY C. LAMEY
- LAMEY, TIMOTHY C., and CAMELIA S. LAMEY. Hatch synchrony and bad food years, 734
- LAUDER, G. V. See A. M. LEROI
- LEISHMAN, MICHELLE R., and MARK WESTOBY. Hypotheses on seed size: tests using the semiarid flora of western New South Wales, Australia, 890
- LEMON, ROBERT E. See TODD WINQUIST
- LENINGTON, SARAH, CAROL B. COOPERSMITH, and MARK ERHART. Female preference and variability among *t*-haplotypes in wild house mice, 766
- LEROI, A. M., M. R. ROSE, and G. V. LAUDER. What does the comparative method reveal about adaptation? 381
- LIFJELD, JAN T. See TORE SLAGSVOLD
- LOREAU, MICHEL. Material cycling and the stability of ecosystems, 508
- LUDWIG, DONALD. See LOCKE ROWE
- MARKOW, THERESE A. See SCOTT PITNICK
- MILLER, THOMAS E. Direct and indirect species interactions in an early old-field plant community, 1007
- MITCHELL, RANDALL J. Effects of floral traits, pollinator visitation, and plant size on *Ipomopsis aggregata* fruit production, 870
- MOOERS, ARNE Ø. See STEPHANIE J. SCHRAG
- NAEEM, SHAHID. See SCOTT V. EDWARDS
- NAGYLAKI, THOMAS. Appendix B: proof that the sex that invests less in offspring experiences stronger sexual selection, 343
- NDIFON, G. TATA. See STEPHANIE J. SCHRAG
- NISHIMURA, KINYA. Decision making of a sit-and-wait forager in an uncertain environment: learning and memory load, 656
- NYCHKA, DOUGLAS. See DOLPH SCHLUTER
- ORZACK, STEVEN HECHT, and ELLIOTT SOBER. Optimality models and the test of adaptationism, 361
- PACALA, STEPHEN W., and DAVID TILMAN. Limiting similarity in mechanistic and spatial models of plant competition in heterogeneous environments, 222
- PAIGE, KEN N. Herbivory and *Ipomopsis aggregata*: differences in response, differences in experimental protocol: a reply to Bergelson and Crawley, 739
- PITNICK, SCOTT, and THERESE A. MARKOW. Male gametic strategies: sperm size, testes size, and the allocation of ejaculate among successive mates by the sperm-limited fly *Drosophila pachea* and its relatives, 785
- POLASEK, WOLFGANG. See BERNHARD SCHMID
- POSSINGHAM, HUGH P., SHRIPAD TULJAPURKAR, JONATHAN ROUGHGARDEN, and MATTHEW WILKS. Population cycling in space-limited organisms subject to density-dependent predation, 563
- RAUSHER, MARK D. See DAVID HOUGEN-EITZMAN
- READ, ANDREW F. See STEPHANIE J. SCHRAG
- RIGNEY, LISA P. See PAUL WILSON
- ROISIN, YVES. Intragroup conflicts and the evolution of sterile castes in termites, 751

- ROSE, M. R. See A. M. LEROI
- ROSENZWEIG, MICHAEL L. See COLIN W. CLARK
- ROUGHGARDEN, JONATHAN. See HUGH P. POSSINGHAM
- ROWE, LOCKE, DONALD LUDWIG, and DOLPH SCHLUTER. Time, condition, and the seasonal decline of avian clutch size, 698
- SANSONE, EMILIA. See ILAN ESHEL
- SCHALL, JOS. J. See GUIYUN YAN
- SCHEMSKE, DOUGLAS W. See JON ÅGREN
- SCHLUTER, DOLPH, and DOUGLAS NYCHKA. Exploring fitness surfaces, 597
- SCHLUTER, DOLPH. See LOCKE ROWE
- SCHMID, BERNHARD, WOLFGANG POLASEK, JACOB WEINER, ANDREAS KRAUSE, and PETER STOLL. Modeling of discontinuous relationships in biology with censored regression, 494
- SCHRAG, STEPHANIE J., ARNE Ø. MOOERS, G. TATA NDIFON, and ANDREW F. READ. Ecological correlates of male outcrossing ability in a simultaneous hermaphrodite snail, 636
- SHAW, RUTH G., and NICKOLAS M. WASER. Quantitative genetic interpretations of postpollination reproductive traits in plants, 617
- SHIPLEY, LISA A., JOHN E. GROSS, DONALD E. SPALINGER, N. THOMPSON HOBBS, and BRUCE A. WUNDER. The scaling of intake rate in mammalian herbivores, 1055
- SIMBERLOFF, DANIEL. See TAMAR DAYAN
- SLAGSVOLD, TORE, and JAN T. LIFJELD. Polygyny in birds: the role of competition between females for male parental care, 59
- SMITH, WILLIAM K., and CAROL A. BREWER. The adaptive importance of shoot and crown architecture in conifer trees, 528
- SOBER, ELLIOTT. See STEVEN HECHT ORZACK
- SPALINGER, DONALD E. See LISA A. SHIPLEY
- STANTON, MAUREEN L. See PAUL WILSON
- STEVENS, LORI. See GUIYUN YAN
- STOLL, PETER. See BERNHARD SCHMID
- TAYLOR, PETER D., and BERNARD J. CRESPI. Evolutionarily stable strategy sex ratios when correlates of relatedness can be assessed, 297
- TELLERÍA, JOSÉ LUIS, and LUIS M. CARRASCAL. Weight-density relationships between and within bird communities: implications of niche space and vegetation structure, 1083
- THOMSON, JAMES D. See PAUL WILSON
- TILMAN, DAVID. See STEPHEN W. PACALA
- TULJAPURKAR, SHRIPAD. See HUGH P. POSSINGHAM
- VAN SCHAİK, CAREL P. See S. JOSEPH WRIGHT
- VINOGRADOV, ALEXANDER E. Cell allometry, 932
- WASER, NICKOLAS M. See RUTH G. SHAW
- WEDEKIND, CLAUS, and IVAR FOLSTAD. Adaptive or nonadaptive immunosuppression by sex hormones? 936
- WEINER, JACOB. See BERNHARD SCHMID
- WESOŁOWSKI, TOMASZ. On the origin of parental care and the early evolution of male and female parental roles in birds, 39
- WESTOBY, MARK. See MICHELLE R. LEISHMAN
- WHITLOCK, MICHAEL C. Fission and the genetic variance among populations: the changing demography of forked fungus beetle populations, 820
- WILKS, MATTHEW. See HUGH P. POSSINGHAM
- WILSON, PAUL, JAMES D. THOMSON, MAUREEN L. STANTON, and LISA P. RIGNEY. Beyond floral Batemanian: gender biases in selection for pollination success, 283
- WINQUIST, TODD, and ROBERT E. LEMON. Sexual selection and exaggerated male tail length in birds, 95
- WRIGHT, S. JOSEPH, and CAREL P. VAN SCHAİK. Light and the phenology of tropical trees, 192
- WUNDER, BRUCE A. See LISA A. SHIPLEY
- YAN, GUIYUN, LORI STEVENS, and JOS. J. SCHALL. Behavioral changes in *Tribolium* beetles infected with a tapeworm: variation in effects between beetle species and among genetic strains, 830

## Alphabetical Table of Contents of Titles

- The adaptive importance of shoot and crown architecture in conifer trees. William K. Smith and Carol A. Brewer, 528
- Adaptive or nonadaptive immunosuppression by sex hormones? Claus Wedekind and Ivar Folstad, 936
- Animal mating systems: a synthesis based on selection theory. Stevan J. Arnold and David Duvall, 317
- Appendix B: proof that the sex that invests less in offspring experiences stronger sexual selection. Thomas Nagylaki, 343
- Assembly rules for communities of nutrient-limited plants and specialist herbivores. James P. Grover, 258
- Behavioral changes in *Tribolium* beetles infected with a tapeworm: variation in effects between beetle species and among genetic strains. Guiyun Yan, Lori Stevens, and Jos. J. Schall, 830
- Beyond floral Batemanian: gender biases in selection for pollination success. Paul Wilson, James D. Thomson, Maureen L. Stanton, and Lisa P. Rigney, 283
- Cell allometry. Alexander E. Vinogradov, 932
- Decision making of a sit-and-wait forager in an uncertain environment: learning and memory load. Kinya Nishimura, 656
- Density dependence and patch dynamics in tropical rain forests: matrix models and applications to a tree species. Elena R. Alvarez-Buylla, 155
- Density dependence and spatial structure in the dynamics of insect pathogens. Greg Dwyer, 533
- Direct and indirect species interactions in an early old-field plant community. Thomas E. Miller, 1007
- Ecological correlates of male outcrossing ability in a simultaneous hermaphrodite snail. Stephanie J. Schrag, Arne Ø. Mooers, G. Tata Ndifon, and Andrew F. Read, 636
- Effects of floral traits, pollinator visitation, and plant size on *Ipomopsis aggregata* fruit production. Randall J. Mitchell, 870
- The effects of genotype and the environment on costs of resistance in lettuce. Joy Bergelson, 349
- The effects of rare but promiscuous genetic exchange on evolutionary divergence in prokaryotes. Frederick M. Cohan, 965
- The energetic equivalence hypothesis and the relation between population density and body size in stream-living salmonids. T. Bohlin, C. Dellefors, U. Faremo, and A. Johlander, 478
- Evolutionarily stable strategy sex ratios when correlates of relatedness can be assessed. Peter D. Taylor and Bernard J. Crespi, 297
- Evolutionary genetics of the major histocompatibility complex. Philip W. Hedrick, 945
- The evolution of soma in the Volvocales. Vassiliki Koufopanou, 907
- Evolution of trichome number in a naturalized population of *Brassica rapa*. Jon Ågren and Douglas W. Schemske, 1
- Experimental analysis of allocation in two divergent, natural salamander populations. Joseph Bernardo, 14
- Experimental evidence for the included niche. Jonathan M. Chase and Gary E. Belovsky, 514
- Exploring fitness surfaces. Dolph Schluter and Douglas Nychka, 597
- Extinction and colonization processes: parameter estimates from sporadic surveys. Colin W. Clark and Michael L. Rosenzweig, 583
- Female preference and variability among *t*-haplotypes in wild house mice. Sarah Lenington, Carol B. Coopersmith, and Mark Erhart, 766
- Fission and the genetic variance among populations: the changing demography of forked fungus beetle populations. Michael C. Whitlock, 820
- Hatch synchrony and bad food years. Timothy C. Lamey and Camelia S. Lamey, 734
- Herbivory and *Ipomopsis aggregata*: differences in response, differences in experimental protocol: a reply to Bergelson and Crawley. Ken N. Paige, 739

- Homology and comparative methods in the study of avian cooperative breeding. Scott V. Edwards and Shahid Naeem, 723
- How to behave around cannibals: a density-dependent dynamic game. Philip H. Crowley and Kevin R. Hopper, 117
- Hypotheses on seed size: tests using the semiarid flora of western New South Wales, Australia. Michelle R. Leishman and Mark Westoby, 890
- Interactions between herbivorous insects and plant-insect coevolution. David Hougen-Eitzman and Mark D. Rausher, 677
- Intragroup conflicts and the evolution of sterile castes in termites. Yves Roisin, 751
- Kin recognition and the major histocompatibility complex: an integrative review. Jerram L. Brown and Amy Eklund, 435
- Landscape distribution of organisms and the scaling of soil resources. Mario E. Biondini and Carolyn E. Grygiel, 1026
- Light and the phenology of tropical trees. S. Joseph Wright and Carel P. van Schaik, 192
- Limiting similarity in mechanistic and spatial models of plant competition in heterogeneous environments. Stephen W. Pacala and David Tilman, 222
- Male gametic strategies: sperm size, testes size, and the allocation of ejaculate among successive mates by the sperm-limited fly *Drosophila pachea* and its relatives. Scott Pitnick and Therese A. Markow, 785
- Material cycling and the stability of ecosystems. Michel Loreau, 508
- Modeling of discontinuous relationships in biology with censored regression. Bernhard Schmid, Wolfgang Polasek, Jacob Weiner, Andreas Krause, and Peter Stoll, 494
- Morphological relationships among coexisting heteromyids: an incisive dental character. Tamar Dayan and Daniel Simberloff, 462
- On the origin of parental care and the early evolution of male and female parental roles in birds. Tomasz Wesolowski, 39
- Optimality models and the test of adaptationism. Steven Hecht Orzack and Elliott Sober, 361
- Parent-offspring conflict over sex ratio. II. Offspring response to parental manipulation. Ilan Eshel and Emilia Sansone, 987
- Polygyny in birds: the role of competition between females for male parental care. Tore Slagsvold and Jan T. Lifjeld, 59
- Population cycling in space-limited organisms subject to density-dependent predation. Hugh P. Possingham, Shripad Tuljapurkar, Jonathan Roughgarden, and Matthew Wilks, 563
- Quantitative genetic interpretations of post-pollination reproductive traits in plants. Ruth G. Shaw and Nickolas M. Waser, 617
- Reductionist approaches in community ecology. Pablo Inchausti, 201
- Role of overlapping generations in maintaining genetic variation in a fluctuating environment. Stephen Ellner and Nelson G. Hairston, Jr., 403
- The scaling of intake rate in mammalian herbivores. Lisa A. Shipley, John E. Gross, Donald E. Spalinger, N. Thompson Hobbs, and Bruce A. Wunder, 1055
- Settlement tactics in seasonally territorial animals: resolving conflicting predictions. Eldridge S. Adams, 939
- Sexual selection and exaggerated male tail length in birds. Todd Winquist and Robert E. Lemon, 95
- Sexual size dimorphism and sex ratios in bees and wasps. Ken R. Helms, 418
- Testing pattern predictions of sexual selection: a frog example. Sharon B. Emerson, 848
- Time, condition, and the seasonal decline of avian clutch size. Locke Rowe, Donald Ludwig, and Dolph Schluter, 698

Weight-density relationships between and within bird communities: implications of niche space and vegetation structure. José Luis Tellería and Luis M. Carrascal, 1083

What does the comparative method reveal about adaptation? A. M. Leroi, M. R. Rose, and G. V. Lauder, 381

### Alphabetical Table of Keywords

adaptation, 381  
 adaptationism, 361  
 adaptive landscape, 597  
 allometry, 907, 1055  
 alternative phenotypes, 751  
 analytical cytology, 932  
 aphally, 636  
  
 bacteria, 965  
 balancing selection, 945  
 barnacles, 563  
 Bateman's principle, 283  
*Bedellia*, 677  
 bees, 418  
 behavior, 723  
 biparental care, 39  
 birds, 39, 59, 95  
 body mass, 1055  
 body size, 1083  
*Bolitotherus cornutus*, 820  
*Brassica rapa*, 1  
 brood reduction, 734  
*Bulinus truncatus*, 636  
  
*Cecropia obtusifolia*, 155  
 cell wall, 907  
 censored regression, 494  
 character displacement, 462  
 character evolution, 723  
 cheek pouch, 462  
 chewing, 1055  
 clutch size, 698  
 coefficient of variation, 932  
 communal breeding, 723  
 community, 1007  
 community assembly, 258  
 community ecology, 201  
 comparative method, 95, 381  
 competition, 514, 1007, 1026  
 condition, 698  
 conifer, 528  
 crown, 528  
 curvilinearity, 494  
 cytometry, 932  
  
 deception, 59

*Deloala*, 677  
 density, 1083  
 density dependence, 155, 478  
*Desmognathus ochrophaeus*, 14  
 diallel, 617  
 diapause, 403  
*Diaptomus sanguineus*, 403  
 diffuse coevolution, 677  
 discontinuous relationships, 494  
 disease transmission, 533  
 dispersal, 890  
 dormancy, 890  
 downy mildew, 349  
*Drosophila*, 785  
 dynamic programming, 117  
  
 ecosystem, 508  
 elk, 739  
 endosperm, 617  
 environmental heterogeneity, 222  
 eusocial insects, 751  
 evolution, 39  
 evolutionarily stable state, 361  
 evolutionarily stable strategy, 361, 403, 987  
 evolutionary genetic stability, 987  
 expectation maximization algorithm, 494  
 extinction rate, 583  
  
 female aggression, 59  
 fission, 820  
 fitness, 381, 766  
 fitness surface, 597  
 fixation stability, 987  
 flagella, 907  
 floral attractiveness, 283  
 fluctuating selection, 403  
 forest, 192  
 fractals, 1026  
 frog, 848  
 fruit, 617
